

Wisconsin's No-Call program has been very positive in our household. We used to receive multiple telemarketing calls throughout dinner and the evening. Now we receive just a few from non-profits, which are exempt from the law. Please do not weaken our state's law. Many hours of effort and thought went into creating it and it works to reduce intrusive phone calls. The banking industry has other avenues to promote its service. It does not need to call us at home.
